A SUGGESTION.

Chairman Snowden suggested that it would be well to extend invitations to the governors of Texas, Arkansas, Alabama, Kentucky and Mississippi, as well as the governor and leading citizens of Tennessee, hence he thought it would be well to appoint a committee on invitation.

This was probably because Wilson had failed to chalk out what course he in-tended to pursue, and desired to have a conhe could lay out his line of policy. This is the way the low-credit men of Wilson are talking about it. There are already evidences of the fraction of Memphis edub, German Cadno. The young Democrats of Nashville are stirring up things pretty lively and are daily getting recruits for the Democratic army. Colored men are enrolled as members of the colored club, which was organized a few days ago, and it seems to be having a satisfactory growth. They do not lack for money with growth. They do not lack for money with which to pay the expenses attending their

votes by wandering over the State in a "go-as-you-please race," instead of meeting his competitors on the stump. DOWN THE RIVER.

Mr. B. Hughes, as committee on transportation, said that Mr. Davant and other railroad men had agreed to make round-trip rates much less than one full fare for the round trip. They would be the lowest rates ever given to and from Memphis. The committee was granted further time to report.

COMMITTEES ON SUBSCRIPTION.

Last Saturday the towboat Raven and barges, en route from New Orleans up the river, was stopped at Vicksburg by Health Officer Rice, who found five of the crew down sick with fever of a suspicious character. The men were removed to the quarantine hospital and the Baven proceed on her voyage up the river, despite the protests of the health officer. On the fourteenth instant G. B. Thornton, M.D., and Hon. JACKSON, MISS., August 18, 1880. I

GENTLEMEN—I have the honor to acknowledge the receipt of your communication of the fourteent instant, inclosing copies of your letter of same dat to the governor of Louisiana, and official orders the State board of health of Tennessee, dated Jui, 14th, and soliciting my views on the general subjects involved therein, especially on the relations of New Orleans to the Mississippi valley in the matter of excluding vessels from infected ports during the dangerons senson, and upon the value of the inspection system as an agency for obtaining and imparting information to threatened communities, by which they may be enabled to take prompt and intelligent action for prevention with the least possible interruption to the movements of merchandise and persons.

Upon the general subject involved, I do not hesitate to express the opinion that the State board of health of Tennessee, with the lights before it, and in view of the lamentable experience of 1878 and 1879, was fully justified in the issuance and publication of the order referred to. It had the effect of forestalling unnecessary local quarantines and preventing a recurrence of the excitement of 1878, without seriously affecting the commerce of the country. As New Orleans is the gateway hrough which yellow-fever is introduced into the diagent States and those bordering on the Missistippi river, it certainly devolves upon the authorites of that city to exclude vessels from infected orts during the dangerous season. If they should duse, neglect or fail to do this, or if fever should not its way fint New Orleans, notwiths landing and the supplement and the su

Hon. John Johnson:

DEAR SIR—In reply to your favor of the fourteenth instant, it gives me pleasure to say that the action of the Tennessee State board of health has been, in my opinion, in all respects judicious in the matter of quarantine regulations referred to, it seems to me too clear to need the statement, that the only protection against pestilence and ruin of commerce for the Mississippi valley, lies in thorough inspection under the control of such a body as will command universal respect and confidence. I am very sincerely yours. (CHAS. F. FOLSOM.

Dr. G. B. Thornton, Mempls:

Dr. Br. Sis—in answer to your letter of fourteenth August, asking my opinion on matters therein contained, I would say that I deem the inspecting system instituted by the National board of health for the protection of the people of the Mississippi valley a necessity, not only to prevent the introduction of yellow-fever, but that the traveling public and the commerce of the country might not (in a great measure) be interrupted.

I think it would add greatly to the safety of the people of the Mississippi valley that no vessels from a place infected with yellow-fever should be permitted to enter the port of New Orleans during the heated term or dangerous season. Yours,
